MultiGrip 130mm

ECKO MultiGrips are a versatile bracket that can be easily adjusted onsite to cover multiple fixing scenarios. Suitable for high load applications such as a tie-down connector for trusses or rafter to top-plates and for fixing joists to the face of bearers.

BRANZ Appraised
Appraisal No. 1320

Materials:

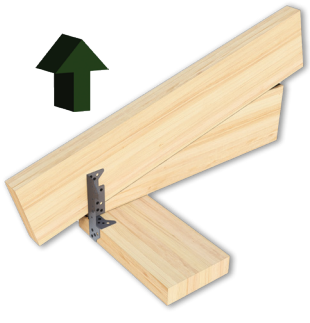

1.0mm G300 Z275 Galvanised Steel - *Internal Use (NZS3604:2011 - Closed Environment)*
1.0mm 304 Stainless Steel - *External Use (NZS3604:2011 - Sheltered & Exposed Environment)*

Load Table	Nails	Screws
Shear	12kN / Pair	11kN / Pair
Tension	3.2kN	-

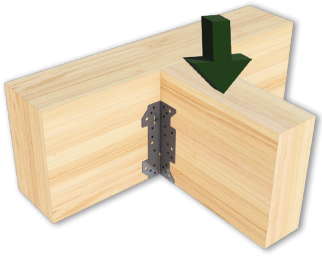

1. Nails - 38 x 3.15mm
2. Screws - 14g x 35mm Hex Head

For use with nails all small holes must be filled and for screw fixing all large holes must be filled.

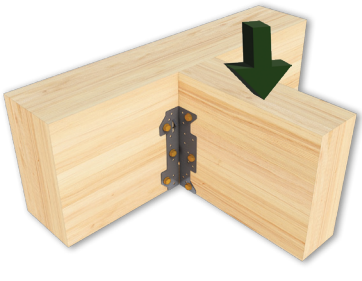

Characteristic Strengths have been derived from testing **in accordance with EM1 as specified in NZS3604:2011.**
